Moreover, based on a review of recent trends in its operating performance and other factors, the Company revised its consolidated operating performance forecast for the fiscal year ending March 31 2025, as described below.

**2. Revisions to consolidated financial results forecast for the fiscal year ending March 31, 2025  
(April 1, 2024 – March 31, 2025)**

	Net Sales	Operating Income	Ordinary Income	Profit Attributable to Owners of Parent	Earnings per Share -Basic-
	Millions of Yen	Millions of Yen	Millions of Yen	Millions of Yen	Yen

**3. Reasons for revision of financial forecast**

Regarding financial results for the first six months of the fiscal year ending March 31, 2025, net sales were generally on par with the initial forecast, but in terms of profit, operating income exceeded the previous forecast due to factors including the increase in yen-translated gross profit in the Electronic Devices Business resulting from the yen's depreciation during the period under review and the reduction in selling, general and administrative expenses. In addition, both ordinary income and profit attributable to owners of parent significantly exceeded the previous forecast as a result of recording foreign exchange gains as non-operating profit due to the yen's appreciation in the foreign exchange market toward the end of the period under review.

Regarding the full-year results for the fiscal year ending March 2025, net sales are expected to be slightly lower than the initial forecast due to the expected stagnation of demand, particularly in the industrial equipment market. On the other hand, the forecasts for profits have been revised upwards as stated above, based on the progress of business performance in the first six months of the fiscal year.

(Note) The above results forecasts have been prepared based on information available as of the date on which this material was announced, and actual results may differ from the forecasts due to a variety of factors going forward.
