Notice Regarding Revision of Dividend Forecast (Dividend Increase)

Marubun Corporation (the “Company”) hereby announces that, in light of its recent business performance trends, it has revised its year-end dividend forecast as follows.

1. Revision of Dividend Forecast

(1) Details of Revision to Year-end Dividend Forecast

	Dividend per share		
	Second quarter-end	Fiscal year-end	Total
	Yen	Yen	Yen
Previously announced forecast (Announced on May 11, 2026)	38.00	39.00	77.00
Revised forecast		62.00	100.00
Results for current fiscal year	38.00		
(Reference) Previous fiscal year (Fiscal year ended March 31, 2026)	25.00	25.00	50.00

(2) Reason for Revision of Dividend Forecast

The Company recognizes the return of profits to shareholders as one of its most important management issues. As announced on May 11, 2026, the Company has set a basic policy of paying continuous and stable dividends, aiming to achieve a consolidated dividend payout ratio of 50% or a dividend on equity (DOE) ratio of 3.5%, whichever is higher.

In accordance with this basic policy, and in light of the upward revision of the full-year consolidated financial results forecast as described in the “Notice of Differences Between Forecast and Actual Results for the First Half of the Fiscal Year Ending March 31, 2027, and Revision of Full-Year Financial Results Forecast” announced today, the Company has revised its year-end dividend forecast for the fiscal year ending March 31, 2027 to 62 yen per share, an increase of 23 yen from the previous forecast. As a result, the annual dividend is expected to be 100 yen per share, and the consolidated dividend payout ratio is expected to be 50.5%.

(Note)

The above results of dividend forecasts have been prepared based on information available as of the date on which this material was announced, and actual results may differ from the forecasts due to a variety of factors going forward.
