Temperature Re-rating Curve

Note:

- Rerating depicted in this curve is in addition to the standard derating of 25% for continuous operation. Example: For continuous operation at 70°C, the fuse should be re-rated as follows:
 $I = (0.75)(0.90)I_n = (0.675)I_n$
- The temperature re-rating curve represents nominal conditions. For questions about the temperature re-rating curve, please consult Littelfuse technical support assistance.
